 Eduardo Rodríguez Sánchez

Profile

- Hard working
- Self-taught
- Highly motivated
- Challenge seeker
- Fast learner

EDUCATION

Computer Science	Exchange year as a senior student in Georgia Institute of Technology	 2023 - 2024  GT
Computer Science and Engineering	Student in the Polytechnics Campus of Madrid for 3 years. Average: 9/10	 2020 - 2023  UC3M
Science bacc.	Studied 1 st of Baccalaureate at Colorado Spring Early Colleges, USA	 2018 - 2020  IES Julio Verne

ABOUT ME

Age: 21 years old
Interests: Backend, Operating Systems, Distributed Systems, Hardware, Embedded Systems, Low Level Programming
Platforms: Arch Linux, OpenSUSE, Ubuntu, Windows

LANGUAGES

Spanish	Native	
English	Fluent	

C++	
C	
Python	
Bash Scripting	

EXPERIENCE

I worked in Samsung Zhilabs as a full time engineer intern during June and July of 2023. During my work in Samsung, I implemented a fully functional recursive descent binary parser for network traces, providing efficient access and recollection of network error data. Throughout the internship I also worked in two main projects:

- I contributed to the developing a remote logging system with syslog.
- I upgraded a network traffic simulator from sequential execution to parallel simulation of many antenna.

HONORS

- Algorithm and data Structure
- Automata and formal language theory
- Heuristics and Optimization
